

Juan Berrio

Cloud & Data Engineer

+57 319 617 3131 | juandyb99@gmail.com | linkedin.com/in/juanberrio | github.com/juanberrio0399 | Bogota, Colombia (Remote - GMT-5)

Cloud & Data Engineer with 6+ years designing low-cost, end-to-end serverless data platforms. Currently processing 25M+ records in production (growing ~2M/month, toward 35M+ in 2026). Real cloud architecture (Cloudflare R2/Pages/Workers, DuckDB-WASM, React) alongside production ETL pipelines (Python, DuckDB, Parquet) with incremental ingestion and automated orchestration. I think in architecture: separating compute, storage and presentation, choosing serverless and optimizing for cost (systems running on ~\$0 infrastructure). Cut report generation time by up to 60%. On the path to Cloud Solutions Architect (studying AWS + Systems Engineering).

TECHNICAL SKILLS

Cloud & DevOps: Cloudflare (R2, Pages, Workers) · Serverless architecture · GitHub Actions (CI/CD) · Git · AWS (in progress)

Data Engineering: ETL Pipelines · Incremental Ingestion · Parquet · DuckDB · Data Warehousing · Dimensional Modeling (Star Schema) · DAX

Languages & Data: Python (Pandas) · SQL · DuckDB SQL

BI & Visualization: Power BI · Power Query · Advanced Excel · React + DuckDB-WASM

Automation / RPA: Playwright · Power Automate · Windows Task Scheduler

AI & Prompt Engineering: LLM integration · Prompt engineering · AI-assisted workflows

KEY ACHIEVEMENTS

- Built a production ETL + warehouse + cloud dashboard system from scratch that runs an international courier's tax reconciliation unattended, 3 times a day.
- -60% report generation time and -40% SQL query time.
- +25% debt recovery through analytics.
- Recurring automations that save 2-4 hours of manual work per day.

PROFESSIONAL EXPERIENCE

Cloud & Data Engineer

Courier Box · Bogota · Jul 2025 - Present

- Designed and operate a production ETL pipeline (Python, ~4,100 lines, readers - transforms - writers architecture) that incrementally ingests the business's Excel files, consolidates them into Parquet and exposes them as a queryable DuckDB warehouse.
- Built package-level tax reconciliation (customs tax + marketplace refunds), joining 5 sources through the manifest as a bridge.
- Shipped analytics on a serverless cloud dashboard (Cloudflare R2 + Pages, React + DuckDB-WASM) with no server to maintain.
- Automated the full run 3 times a day (Task Scheduler + GitHub Actions) with incremental ingestion and failure isolation.

Data Analyst & Automation Specialist

Market Mix · Bogota · Oct 2022 - Feb 2025

- Built ETL pipelines extracting and consolidating data from SQL, SharePoint, Excel, CRMs and Google Sheets.
- Cut report generation time by 60% with automated Power BI dashboards.
- Optimized SQL queries for up to 40% faster response times.
- Automated data cleaning and consolidation, saving 2-4 hours of manual work daily.

Debt Recovery & Portfolio Analyst

Microbank · Bogota · Feb 2022 - Oct 2022

- Increased debt recovery by 25% through payment-behavior and delinquency analysis.
- Implemented automated reminders that lifted response rate by 20%.
- Reduced CRM data-entry errors by 30% with automated validations.

Customer Service Supervisor

Market Mix · Bogota · Jun 2018 - Feb 2022

- Led customer service teams; reached 95% quality compliance and +15% satisfaction.
- Cut team response times by 20% by implementing best practices.

EDUCATION

- Systems Engineering (in progress) - Uniminuto - expected 2027
- Software Development Technician - Fundetec - expected 2026
- Administrative Assistant Technician - SENA - 2016

CERTIFICATIONS & LANGUAGES

- AWS Cloud Practitioner Essentials - AWS Training & Certification (Jun 2026); Python Programming (Levels 0-2) - Code Avengers (90-93%).
- AWS Certified Cloud Practitioner (CLF-C02) - in preparation.
- Spanish: native · English: basic (reading), working toward B2.
